About the Company

Founded in 2010, Spas Recycling Pvt Ltd, delivers comprehensive solutions to the growing challenges of managing and recycling of waste, We are dedicated to creating a sustainable future by providing efficient, innovative, and eco-friendly recycling solutions. Specializing in the recycling of electronic waste (e-waste), plastic waste, metal scrap, and battery scrap, we offer comprehensive services that help businesses and individuals reduce their environmental impact while promoting resource recovery. We are committed to turning waste into valuable resources, contributing to a cleaner planet for future generations.

CEO's Message

Together, let's make the world a cleaner, greener place for generations to come.

Our Mission and Vision

We are MPCB, CPCB, SEZ, ISO 9001:2015, ISO 14001:2015, ISO 20000-1:2018, ISO 45001:2018 authorized recycling company with Integrated E-waste Recycling, Plastic Recycling, Metal Recycling, Battery Recycling & Cable Recycling facilities with sophisticated machineries for each type of recycling. We are your final destination for your total scrap or waste recycling in India, efficient and dedicated.

Mission

To revolutionize waste management and recycling by adopting cutting-edge technologies, environmentally responsible practices, and fostering a circular economy. We aim to reduce the environmental footprint of waste materials while providing our clients with responsible recycling solutions that align with global sustainability standards.

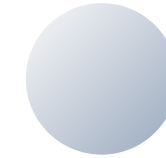

Vision

To be a leading force in global waste recycling, driving the transition towards a circular economy, minimizing waste, and conserving natural resources for a greener and more sustainable planet.

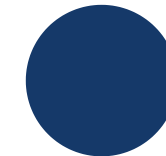

Our Goals

Our goals is to ensure industries, companies, corporates and government agencies to provide a profitable model for complying with both their legal and social responsibilities towards the environment.

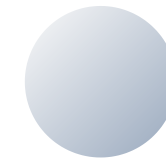

Sustainability

We prioritize eco-friendly solutions and practices in every aspect of our operations.

Innovation

We invest in state-of-the-art technologies to improve efficiency and reduce environmental impact

Integrity

We conduct our business with transparency, honesty, and responsibility.

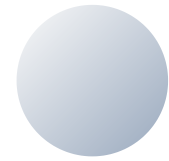

Collaboration

We believe in working closely with our clients, communities, and partners to create lasting environmental change.

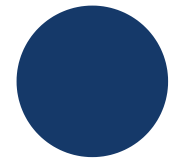

Safety

We ensure the health and safety of our employees, clients, and the environment in all our operations.

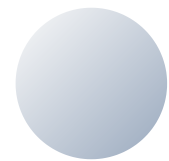

Eco-Friendly Practices

Our solutions help businesses and individuals reduce waste and support sustainability goals.

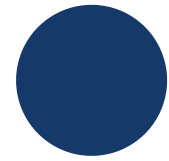

Comprehensive Services:

We handle a wide range of materials, from e-waste to metal and plastic recycling, offering an all-in-one solution.

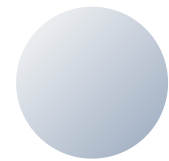

Compliance

We adhere to the highest standards of environmental compliance and safety regulations.

Expert Team

Our experienced team of professionals provides customized recycling services tailored to your specific needs

Certified & Trusted

We are a certified, reliable partner in the recycling industry with a proven track record.

Why Choose Us?

Our Management Team

Our company management consisting of a staff of highly trained and professional recycling specialists with over 15 years of experience in the fields of technology, logistics and recycling.

Our Offered Services

Get Professional Waste Management & Recycling Services by India's leading CPCB and MPCB Authorized Recyclers. Contact Us Now..

- ◆ **Electronic/Electrical Waste (E-Waste) Recycling**
- ◆ **Plastic Waste Recycling**
- ◆ **Metal Scrap Recycling**
- ◆ **Battery Scrap Recycling**
- ◆ **EPR Services**
- ◆ **CSR Services**

E-Waste Recycling

We specialize in the responsible collection, dismantling, and recycling of electronic waste, including old computers, smartphones, televisions, printers, and other consumer electronics. Our e-waste recycling process ensures the safe disposal of hazardous materials like lead, mercury, and cadmium, while recovering valuable metals and components for reuse.

Key Services

1 Secure data destruction and data sanitization

2 Dismantling of electronic devices

3 Recovery of precious metals and components

4 Environmental compliance with global standards

Plastic Waste Recycling

Plastic waste is a major environmental challenge, and we are committed to providing innovative recycling solutions for all types of plastic materials. From PET bottles to industrial plastic, we use advanced technologies to recycle plastics, turning waste into reusable raw materials for new products.

Key Services

- 1 Collection and sorting of plastic waste**
- 2 Mechanical and chemical recycling processes**
- 3 Production of recycled plastic pellets and products**
- 4 Plastic waste reduction strategies for businesses**

Metal Scrap Recycling

We offer efficient and eco-friendly metal scrap recycling services, dealing with ferrous and non-ferrous metals, including copper, aluminum, steel, and iron. Our advanced sorting and processing techniques recover metals, which are then processed and reused in manufacturing.

Key Services

- 1 Collection and sorting of metal scrap**
- 2 Shredding, crushing, and melting of metals**
- 3 Recovery of high-value metals like copper and aluminum**
- 4 Safe disposal of metal waste according to regulatory standards**

Battery Scrap Recycling

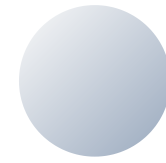

Batteries contain valuable metals and materials but can also be hazardous if not disposed of properly. We specialize in the safe recycling of batteries, including lithium-ion, lead-acid, and other types, ensuring the recovery of essential materials and preventing contamination of the environment.

Key Services

- 1 **Safe collection and transportation of used batteries**
- 2 **Environmentally responsible battery dismantling and recycling**
- 3 **Recovery of metals such as lithium, cobalt, nickel, and lead**
- 4 **Compliance with environmental regulations on battery disposal**

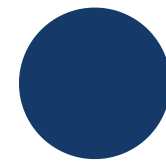

Technology and Processes

At Spas Recycling, we employ state-of-the-art technology to ensure the efficient and environmentally responsible recycling of all materials. Our advanced processes include:

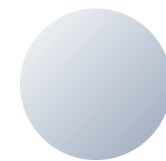

Automated Sorting Systems

High-tech machinery to sort materials by type, size, and composition, improving recovery rates and efficiency

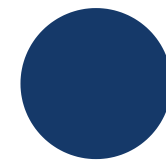

Hydrometallurgical & Pyrometallurgical Techniques

These methods are used to extract valuable metals from e-waste and metal scrap while minimizing environmental harm.

Closed-Loop Recycling

We focus on creating a circular economy, where waste materials are processed and reused repeatedly to reduce resource extraction

Eco-Friendly Disposal

Safe disposal of toxic and non-recyclable waste, adhering to local and international environmental regulations.

EPR Services

As a leading provider of EPR services, Spas Recycling offers a full suite of solutions to help businesses comply with local, national, and international EPR requirements. Our services include:

EPR Compliance Consultation

We provide expert consultation services to help businesses understand and navigate complex EPR regulations. Whether you're a manufacturer, importer, or retailer, we guide you through the EPR requirements in your region and assist with strategy development for compliance.

Analysis of regulatory requirements based on product type and geography

EPR policy mapping and gap analysis

Customized compliance strategies

Risk assessment and mitigation

EPR Registration and Reporting

We handle the registration process with government authorities and ensure that your company meets all reporting obligations under EPR. Our team helps you stay on top of deadlines and reporting requirements, reducing the risk of non-compliance.

- ◆ Registration with EPR schemes and authorities
- ◆ Data collection and reporting of waste generation and recycling rates
- ◆ Preparation of mandatory annual reports
- ◆ Digital platform for efficient data management and tracking

Waste Collection and Recycling Management

We manage the collection, transportation, and recycling of products and packaging that fall under EPR regulations. We ensure that these materials are processed in compliance with environmental standards, reducing the environmental impact and promoting resource recovery.

- ◆ Establishment of collection networks for post-consumer products
- ◆ Coordination with certified recyclers and waste management facilities
- ◆ Secure destruction of non-recyclable or hazardous waste
- ◆ Tracking and verification of waste processing and recycling rates

Product Take-Back Programs

We help design and implement take-back programs that encourage consumers to return used products or packaging for recycling. These programs help businesses meet their EPR obligations while engaging customers in responsible recycling practices.

- ◆ Development of consumer education programs
- ◆ Logistics and infrastructure for product collection
- ◆ Partnering with retailers and local communities for return initiatives
- ◆ Data collection for product take-back and recovery rates

EPR Scheme Management and Compliance Audits

We provide ongoing monitoring, auditing, and reporting to ensure that your business remains compliant with EPR regulations. Our team conducts regular audits to ensure that recycling and waste management processes meet regulatory standards and align with best practices.

- ◆ Annual compliance audits
- ◆ Tracking and reporting of recovery rates
- ◆ Certification of compliance with EPR schemes
- ◆ Management of non-compliance issues and corrective actions

Environmental Impact

- 1 Prevent millions of tons of waste from ending up in landfills.**
- 2 Contribute to the conservation of raw materials, such as metals, plastics, and minerals.**
- 3 Reduce greenhouse gas emissions through energy-efficient recycling processes.**
- 4 Ensure proper disposal of hazardous materials, preventing pollution and soil contamination.**

Environmental Analysis

- 1 Product lifecycle analysis (LCA)**
- 2 Recommendations for eco-design and sustainable packaging**
- 3 Carbon footprint reduction strategies**
- 4 Sustainable product end-of-life planning**

CSR Services

As a comprehensive CSR services provider, Spas Recycling offers a wide range of solutions to help organizations integrate social responsibility into their business operations. Our services cover strategy development, program execution, impact assessment, and stakeholder engagement.

- ◆ **CSR Strategy Development**
- ◆ **CSR Program Implementation**
- ◆ **CSR Reporting & Communication**
- ◆ **Employee Engagement and Volunteering**
- ◆ **Community Investment & Partnerships**
- ◆ **Sustainability Consulting**
- ◆ **CSR Impact Assessment & Evaluation**

Expertise
We bring deep knowledge of CSR best practices, sustainability frameworks, and global standards to every project.

Tailored Solutions
We understand that each organization is unique, and we create customized CSR strategies that align with your goals and industry.

Comprehensive Support
From strategy development to implementation and reporting, we provide end-to-end support for your CSR initiatives.

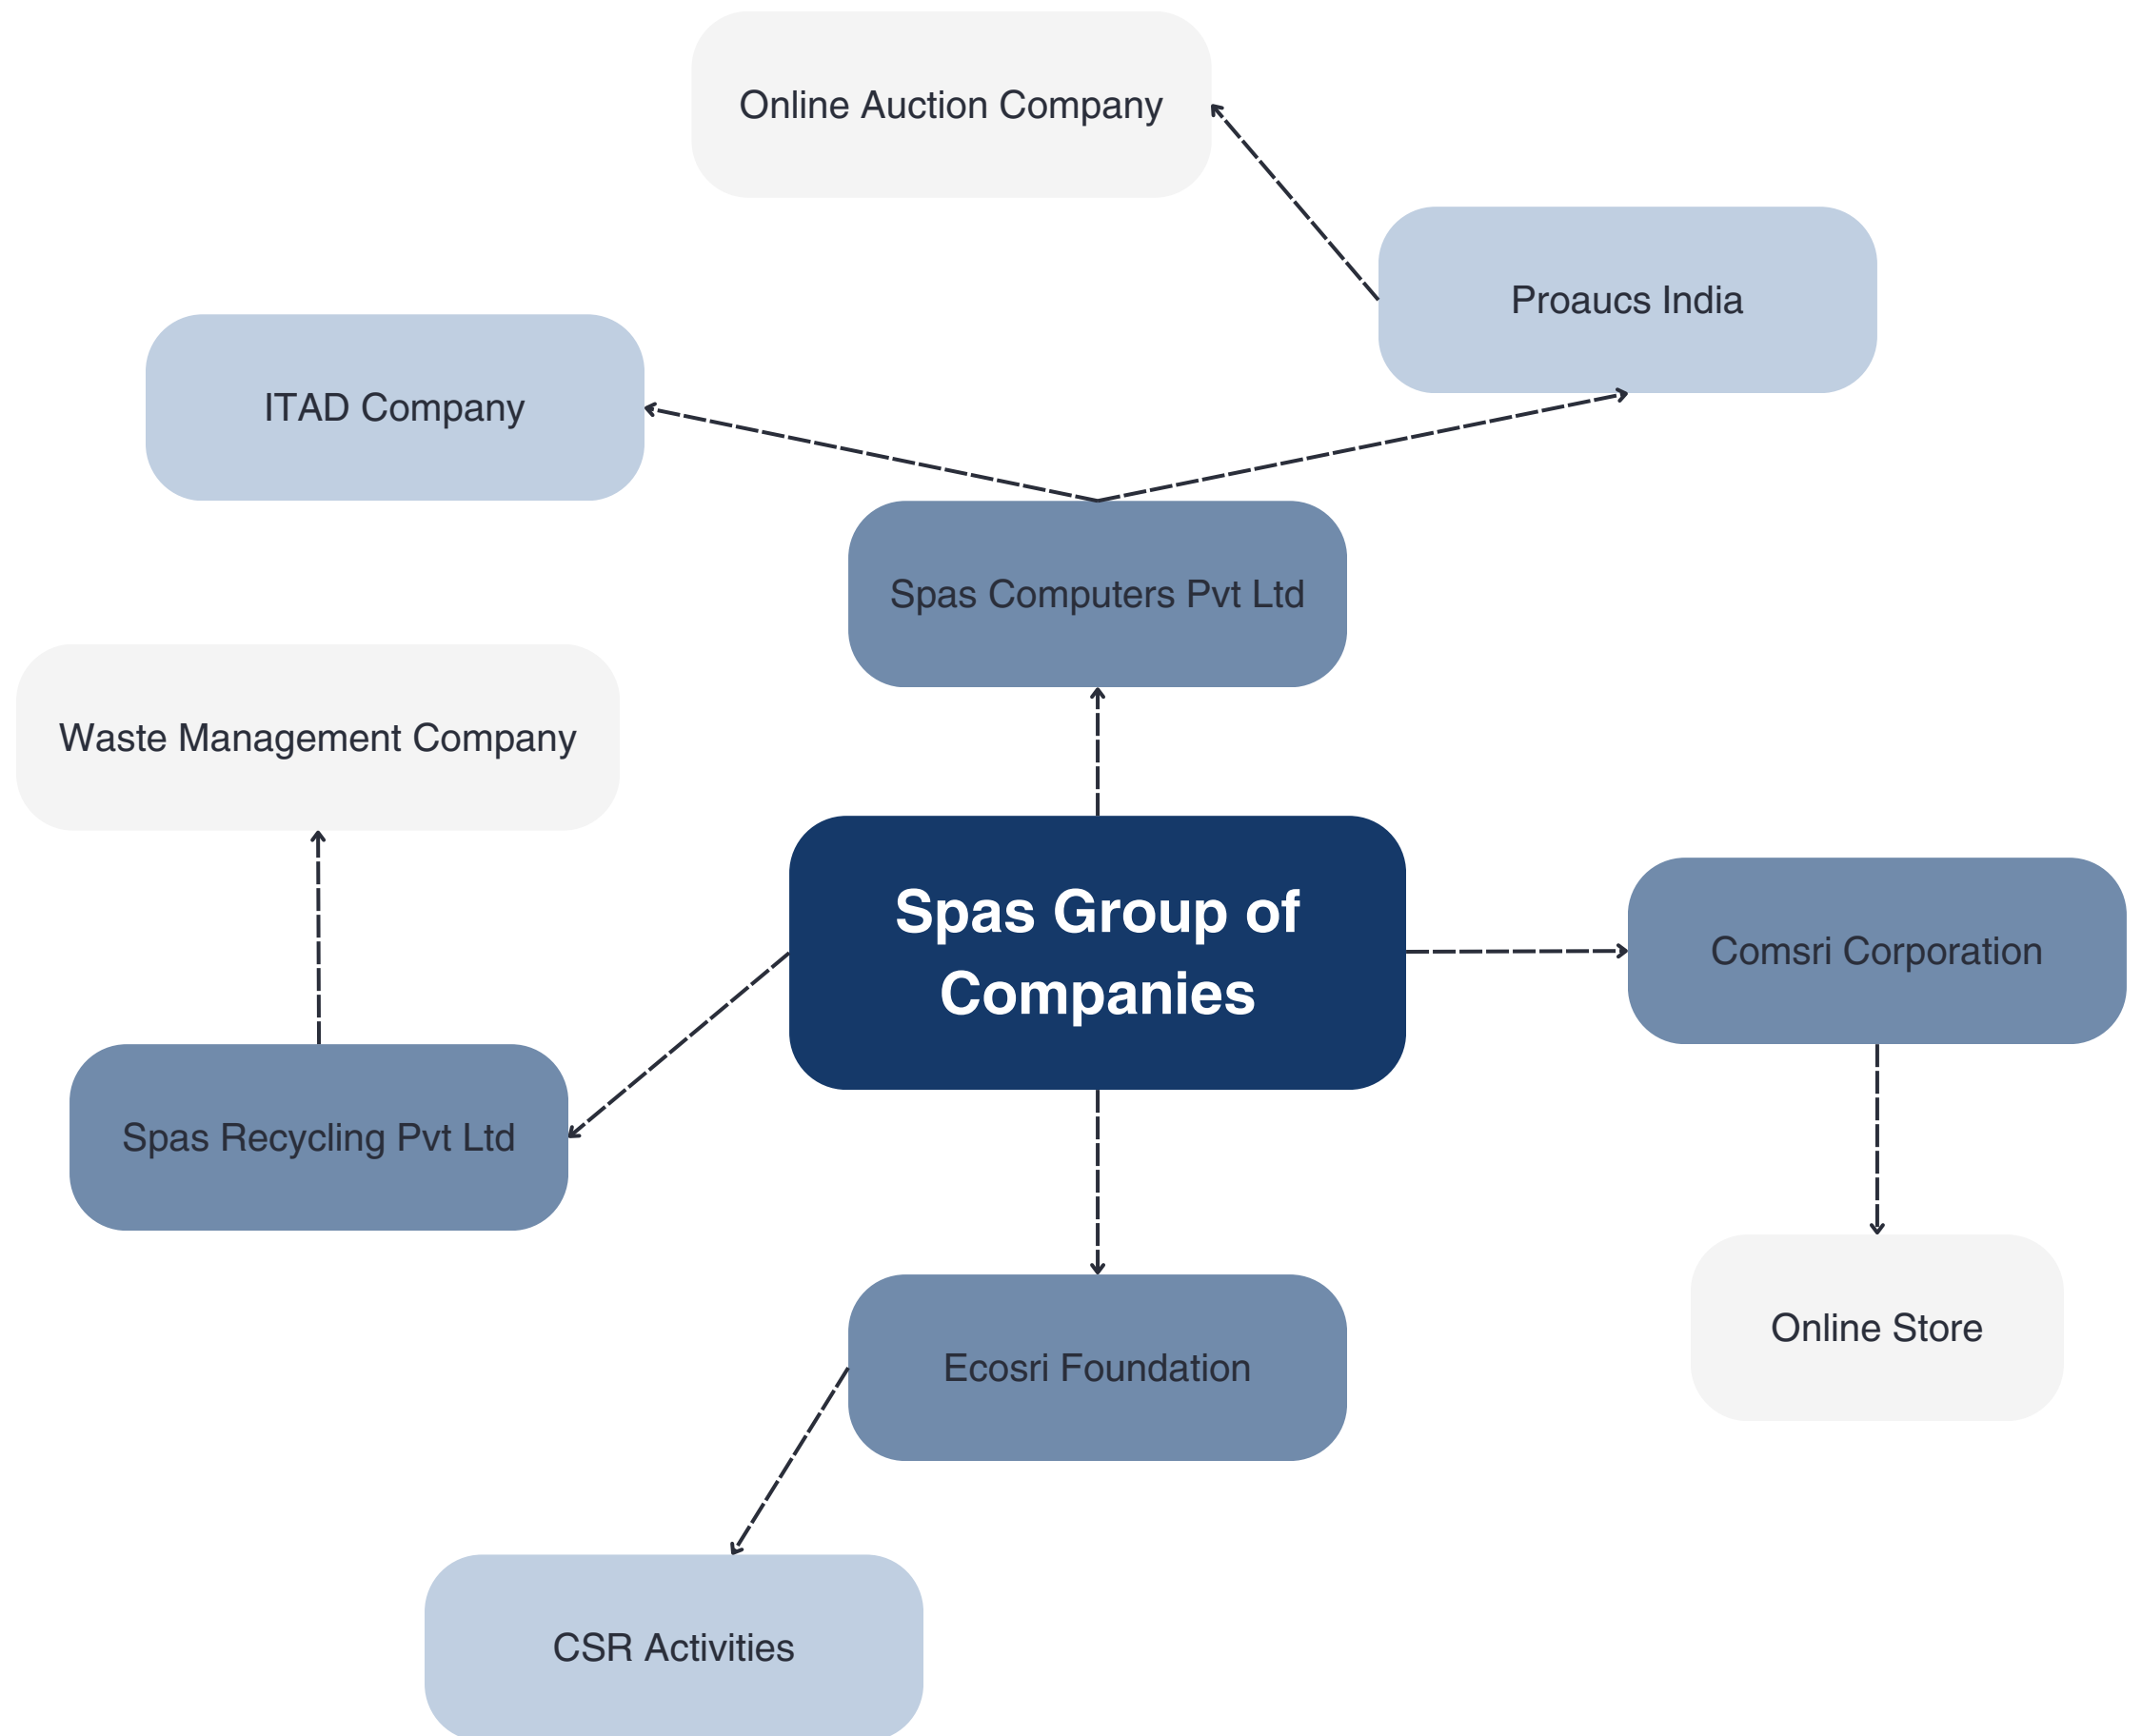

Measurable Impact
Our focus is on creating programs that drive real change, with measurable outcomes that benefit both your business and society.

Reputation Building
By partnering with us, you enhance your brand's reputation as a socially responsible company committed to making a difference.

Industries We Serve

- ◆ **Electronics & Electricals Manufacturers**
- ◆ **Automotive Industry**
- ◆ **Retail and Consumer Electronics**
- ◆ **Commercial and Industrial Waste**
- ◆ **Banks & Financial Institutions**
- ◆ **Municipalities and Local Governments**
- ◆ **Battery Manufacturers & Distributors**
- ◆ **OEM's**
- ◆ **Corporates & Call Centers**
- ◆ **Educational Institutions**
